ZERODE

CONGRATULATIONS

On purchasing your very own Zerode and joining the shift to a better riding experience. We have no doubt this bike will give you as much fun and enjoyment as it has given us. We have had a vision for what we wanted a mountain bike to be since first throwing a leg over a one in 1992. After advances in materials and manufacturing allowed us to deliver the Taniwha, we have now expanded our line up with the ultra capable Taniwha and Katipo lines. we design our bikes with the best possible riding experience in mind. They're made to inspire you with confidence and have you ride your absolute best. Whether you race at the highest level, search out the most epic back country adventures or just blast the local trails, Zerode has your back and will leave you with a smile after every ride. Just make sure you get out and ride.

WARRANTY

Zerode frames are warranted against manufacturing defects in materials and/or workmanship for two years from the date of original purchase. This limited warranty applies only to the original owner of the bike and is not transferable to subsequent owners. This limited warranty is void if the bicycle is subjected to abuse, neglect, improper repair, improper maintenance, alteration, modification, an accident or other abnormal, excessive, or improper use.

MAINTENANCE

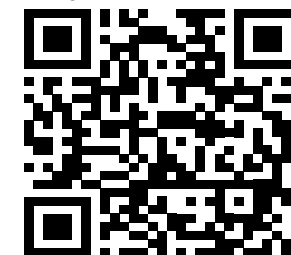

It is important to properly maintain and inspect your Zerode. Although they are less maintenance intensive than conventional mountain bikes they still require love from time to time.

You should regularly check pivots and pivot bolts, and insure your frame bearings are functioning to an acceptable standard. If you discover damage to any degree have your bike checked by a trusted bike shop. For a detailed care guide for your GATES CARBON DRIVE as well as the Zerode web support page see the QR codes below.

PINION GEARBOX

Gearboxes offer many advantages over traditional drive trains - less wear and tear, less maintenance and better suspension performance - however, you will need to make some small adjustments to get the best of what the Pinion gearbox has to offer. The most important difference is that you cannot shift under load. For first-time users this may feel a little unusual however the shift is almost instantaneous and pedaling is not required to change gear. With a little practice eliminating load from the pedals will become second nature allowing seamless shifting through the gear range in situations not possible with a derailleur. For extensive service and trouble shooting guides follow the QR code below.

26	Main pivot bearing spacer	1	
27	Grommet	1	
28	Shock eye bolt link	1	11.5 N M
29	Link bearing spacer	1	
30	Link pivot shaft wedge	1	
31	Link pivot shaft	1	22 N M
33	Link pivot shaft wedge	1	

Thank you

We are a small team that loves what we do and buy purchasing this bike it means we can keep doing just that.

That's enough reading, now it's time to get out there and ride! We hope you love it as much as we do, happy trails!

Thanks from the small team at ZERODE BIKES
